

CHAPTER Agr 2100 IMPORTATION OF BOVINES AND OTHER DOMESTIC ANIMALS INTO THE  
STATE OF NEW HAMPSHIRE

Statutory Authority: RSA 436:24 and RSA 436:10

PART Agr 2101 PURPOSE, SCOPE AND DEFINITIONS

**Readopt with amendment Agr 2101, effective 8/31/05 (Document #8423), to read as follows:**

Agr 2101.01 Purpose. The purpose of these rules is to ensure that domestic animals brought into this state are healthy and free from contagious and infectious diseases.

Agr 2101.02 Scope. These rules shall apply to all animals proposed to be or actually imported into the state of New Hampshire, but only to the extent of determining the health of the domestic animals.

Agr 2101.03 Definitions.

(a) "Accredited veterinarian" means a licensed veterinarian approved by the USDA-APHIS administrator and the state animal health official to perform duties as outlined in 9 CFR, 161.2(d)(1) through (16).

(b) "Buffalo" means all animals of the genus bison.

(c) "Buffered acidified plate antigen" (BAPA) means a test for diagnosing brucellosis in cattle serum.

(d) "Camelidae" means llamas, alpacas, guanacos, vicunas and camels.

(e) "Cattle" means all bovine animals in genus bos.

(f) "Certificate of veterinary inspection" means a certificate attesting to the health of an animal or animals, with appropriate test results listed, which are moving interstate and are free of any evidence of contagious or infectious diseases.

(g) "Cervidae" means ~~all species of deer, elk~~ **(Cervus elephus canadensis), fallow deer (Dama dama) red deer (Cervus elephus) and reindeer (Rangifer tarandus), and moose.**

(h) "Chronic wasting disease" (CWD) means a transmissible spongiform encephalopathy of deer and elk characterized by vacuolar changes in the brain.

(i) "Coggins test" means a test for equine infectious anemia (EIA).

(j) "Commissioner" means the commissioner of agriculture, markets and food.

(k) "Domestic animals," as used in RSA 436:1, II, means domestic farm animals and poultry, and includes camelidae, cervidae, ratite, ferrets and buffalo.

(l) "Equine" means horses, asses, mules, zebras, ponies or any other calibus species.

(m) "Equine infectious anemia" (EIA) means a viral caused disease of the equine species.

(n) "Microchip" means electronic identification.

(o) "NPIP" means national poultry improvement plan.

(p) "Poultry" means meat and egg type chickens, turkeys, birds of prey, exhibition and game birds and hatching eggs thereof, such as pheasant and quail.

(q) "Psittacine" means birds belonging to the parrot family most commonly being the macaw, conures, parrots, parakeets, cockatoos and cockatiels.

(r) "Ratite" means emu, rhea, ostrich, moa, kiwi and cassowary.

(s) "Rivinal test" means a plate agglutination for brucellosis to determine the field strain of the disease in the serum of cattle, goats, sheep, cervidae, camelidae, buffalo or yak.

(t) "Scrapie" means a degenerative neurologic disease of sheep and goats.

(u) "USDA-APHIS" means United States department of agriculture, animal and plant health inspection service.

(v) "VS Form 9-3" means a United States department of agriculture form for reporting the sale of hatching eggs, chicks and poults.

(w) "Yak" means a large long haired ox from Tibet and central Asia.

**Readopt Agr 2102.01 thru Agr 2102.05, effective 8/31/05 (Document #8423), to read as follows:**

PART Agr 2102 REQUIREMENTS OF IMPORTATION OF BOVINES AND OTHER DOMESTIC ANIMALS

Agr 2102.01 All Domestic Animals and Poultry Entering the State of New Hampshire.

(a) All domestic animals and poultry entering New Hampshire shall:

(1) Be in compliance with federal regulations; and

(2) Not be known to be infected with or exposed to any contagious or infectious disease or from a quarantined area.

Agr 2102.02 Who Inspects. Any accredited veterinarian from the state of origin may inspect the animals for interstate movement and fill out the certificates of veterinary inspection.

**Agr 2102.03 Permits for Entry.**

(a) No poultry, swine, ratites, buffalo, camelidae, cervidae, yaks and/or psittacine birds shall be shipped into New Hampshire without a prior permit.

(b) Permits shall be issued by telephone or in writing for the importation of poultry, swine, ratites, buffalo, camelidae, cervidae, yaks and/or psittacine birds when all testing requirements have been complied with and a certificate of veterinary inspection is being prepared by the inspecting accredited veterinarian. The permit number shall appear on the certificate of veterinary inspection, one copy of which shall accompany the animal to the state of destination. Subsequent approval by the chief regulatory official of the state of origin shall be required.

(c) The permit and/or certificate of veterinary inspection pertaining to the species as described in Agr 2102.03(b) shall be:

(1) Attached to the waybill; or

(2) In the possession of the driver of the vehicle in which the livestock is imported.

(d) Permits for import of domestic animals into the state shall be obtained from the:

NH Department of Agriculture, Markets and Food

Division of Animal Industry

PO Box 2042

Concord, NH 03302-2042

Telephone: 603-271-2404

**Agr 2102.04 Requirements for Certificate of Veterinary Inspection.**

(a) A certificate of veterinary inspection shall be:

(1) A certificate containing information required pursuant to (b) below; and

(2) Issued by an accredited veterinarian who is licensed in the state of origin.

(b) The accredited veterinarian shall include the following on the certificate of veterinary inspection:

(1) Names and addresses of the consignee and the consignor;

(2) The health status of the animals, poultry and/or other species involved; and

(3) The results of required testing and dates.

(c) Certificates of veterinary inspection shall be valid for 30 days from date of issue.

**Agr 2102.05 Laboratory Tests and Other Tests.**

(a) All laboratory tests of animals intended for interstate movement into New Hampshire shall be performed at diagnostic laboratories approved by Veterinary Services, USDA, Animal and Plant Health Inspection Service.

(b) All non-laboratory tests shall be applied by an accredited veterinarian of the state of origin.

**Readopt Agr 2102.06, effective 8/31/05 (Document #8423), to read as follows:****Agr 2102.06 Vesicular Stomatitis**

(a) No bovine, porcine or equine species may enter New Hampshire from a state where vesicular stomatitis has been diagnosed, except as follows:

(1) The animals were located on a premise that is at least 10 miles from a diagnosed infected premise;

(2) The animals have not been exposed to vesicular stomatitis or been on a premise that has vesicular stomatitis within the last 30 days; and

(3) The following statement shall be on the certificate of veterinary inspection with a prior permit number from the division of animal industry at (603) 271-2404 and signed by an accredited veterinarian:

“All animals identified on this certificate have been examined and found to be free from signs of Vesicular stomatitis. These animals neither originated from nor been exposed to premises or animals where Vesicular stomatitis has been diagnosed.”

**Readopt Agr 2103 thru Agr 2107, effective 8/31/05 (Document #8423), to read as follows:****PART Agr 2103 CATTLE****Agr 2103.01 Brucellosis.**

(a) Cattle from brucellosis classified-free states or Canadian provinces may enter into New Hampshire without a blood test for brucellosis. Certificates of veterinary inspection shall be required.

(b) The following shall apply to all cattle from states or Canadian provinces not brucellosis classified-free:

(1) All cattle for dairy or breeding purposes over 18 months of age entering New Hampshire shall be blood tested negative in all dilutions to the brucellosis test, buffered acidified plate antigen or rivinol;

(2) If the BAPA test is positive, then a rivinol test shall be negative;

(3) No person shall import cattle for dairy or breeding purposes unless the cattle originate directly from negative herds in brucellosis-free areas on a 30-day negative brucellosis test prior to the date of shipment;

(4) All imports shall be subject to retest between 60 and 120 days from the date of arrival unless tested within 30 days prior to arrival.

(5) No person shall import animals not qualifying under Agr 2103.01(b), (3) into New Hampshire except under U.S.D.A. Permit for Movement of Animals VS Form 1-27 issued by the state veterinarian, state of origin, or his/her representative and subject to slaughter or quarantine upon arrival;

(6) A person may import cattle under 18 months of age into New Hampshire without a brucellosis test if the cattle have been vaccinated for brucellosis between the ages of 120 and 240 days, under state and federal supervision, and the certificate of veterinary inspection includes a record to that effect;

(7) Unvaccinated calves 6 months of age and older shall require a brucellosis test within 30 days of shipment; and

(8) A person may import unvaccinated calves under 180 days or 6 months of age and the calves without the required blood test prior to entry into New Hampshire provided the cattle are identified as the progeny and come directly from a negative or brucellosis free herd not under quarantine and the certificate of veterinary inspection so states.

#### Agr 2103.02 Tuberculosis.

(a) All cattle from tuberculosis accredited-free states or Canadian provinces may enter New Hampshire without being tested for tuberculosis. Certificates of veterinary inspection shall be required.

(b) The following shall apply to cattle from states or Canadian provinces not tuberculosis accredited-free:

(1) A person may import all cattle for dairy and breeding purposes coming directly from a modified accredited area or from a tuberculosis free area if the cattle have had a negative tuberculin test applied not more than 60 days prior to shipment;

(2) A person may import calves under 6 months of age from negative herds under supervision testing within one year without a test if properly identified with either a metal eartag, legible tattoo or microchip, as progeny of a tuberculin tested dam; and

(3) No person shall import all other cattle except under U.S.D.A. Permit for Movement of Animals VS Form 1-27 issued by the state veterinarian, state of origin, or his/her representative and subject to slaughter or quarantine upon arrival.

(c) For purposes of (B) (1) above modified accredited means: a state or zone that is tuberculosis free in cattle, and will be elevated to accredited free state or zone in 5 years.

Agr 2103.03 Identification of Cattle. All cattle entering New Hampshire shall be identified with a legible tattoo, metal ear tag or microchip, providing a reader is available.

#### PART Agr 2104 SLAUGHTER CATTLE

Agr 2104.01 Slaughter Cattle Brought Into State of New Hampshire. Slaughter cattle may be brought into the state of New Hampshire without a test or permit if consigned directly to a federally inspected slaughtering establishment.

#### PART Agr 2105 SHEEP

##### Agr 2105.01 Certificate of Veterinary Inspection Required.

(a) All sheep and lambs entering New Hampshire for purposes other than immediate slaughter shall be accompanied by a certificate of veterinary inspection.

(b) The accredited veterinarian shall certify on the certificate of veterinary inspection that:

(1) All sheep and lambs are individually identified by permanent metal ear tag, legible tattoo or microchip, providing a reader is available;

(2) The flock of origin was carefully examined not more than 30 days prior to entry, and that such examination revealed no infectious and contagious diseases; and

(3) The sheep and/or lambs did not originate from a scrapie-infected flock and are not progeny of a sire or dam that was infected with scrapie.

#### PART Agr 2106 SLAUGHTER SHEEP

Agr 2106.01 Requirements for Slaughter Sheep. The requirements for slaughter sheep shall be the same as for slaughter cattle, as set forth in Agr 2104.

#### PART Agr 2107 GOATS

##### Agr 2107.01 Brucellosis and Tuberculosis.

(a) All goats from states or Canadian provinces brucellosis classified-free and tuberculosis accredited-free may enter New Hampshire without testing for brucellosis and tuberculosis, with the following:

(1) A certificate of veterinary inspection; and

(2) A legible tattoo, permanent metal ear tag or microchip, providing a reader is available, as identification.

(b) All goats from states or Canadian provinces not brucellosis classified-free and tuberculosis accredited-free shall:

- (1) Have been tested negative for tuberculosis within 60 days of entry;
- (2) Have been tested negative for brucellosis within 30 days of entry; and
- (3) Be identified with a legible tattoo, permanent metal ear tag or microchip, providing a reader is available.

Agr 2107.02 Scrapie. No goats known to be infected with scrapie, and no progeny of goats known to be infected with scrapie, shall be transported or moved into New Hampshire.

Agr 2107.03 Goats Under 6 Months of Age.

(a) All goats under 6 months of age from states or Canadian provinces classified-free and tuberculosis accredited-free shall be identified with a legible tattoo, metal ear tag or microchip, providing a reader is available, and may enter New Hampshire with a certificate of veterinary inspection.

(b) All goats under 6 months of age from states or Canadian provinces not brucellosis classified-free and tuberculosis accredited-free shall be from progeny of a brucellosis and tuberculosis tested dam, identified with a legible tattoo, metal ear tag or microchip, providing a reader is available, and may enter New Hampshire with a certificate of veterinary inspection.

**Readopt Agr 2108 thru Agr 2115.03, effective 8/31/05 (Document #8423), to read as follows:**

**PART Agr 2108 SLAUGHTER GOATS**

Agr 2108.01 Requirements for Slaughter Goats. The requirements for slaughter goats shall be the same as for slaughter cattle, as set forth in Agr 2104.

**PART Agr 2109 SWINE**

Agr 2109.01 Permit and Certificate of Veterinary Inspection Required.

(a) A certificate of veterinary inspection shall be required for the importation of swine into the state of New Hampshire.

(b) The permit shall be obtained prior to shipment and the number shall appear on the certificate of veterinary inspection.

(c) The accredited veterinarian shall certify on the certificate of veterinary inspection that:

- (1) All swine are individually identified by permanent metal ear tag, legible tattoo or microchip, providing a reader is available;
- (2) All swine on the premises have been inspected;
- (3) The swine have never been fed raw garbage or ~~have~~ been exposed to swine that have been fed raw garbage; and
- (4) The swine are free from all contagious and infectious diseases.

Agr 2109.02 Brucellosis.

(a) All swine, unless consigned to slaughter shall:

- (1) Originate from a validated brucellosis-free state;
- (2) Originate from a validated brucellosis-free herd; or
- (3) Be individually tested for brucellosis within 30 days prior of entry.

Agr 2109.03 Pseudorabies.

(a) All swine, unless consigned to immediate slaughter, shall:

- (1) Originate from a pseudorabies qualified negative herd;
- (2) Originate and be shipped directly from a pseudorabies class IV or free state; or
- (3) Be individually tested negative for pseudorabies within 30 days prior to entry.

Agr 2109.04 Feeder Swine.

(a) Feeder swine less than 120 days of age imported for the exclusive purpose of feeding for slaughter shall be individually identified with a metal ear tag, legible tattoo or microchip, providing a reader is available.

(b) Feeder swine shall also:

- (1) Originate from a pseudorabies class IV or free state;
- (2) Originate from a qualified negative herd;
- (3) Originate from a pseudorabies monitored herd; or
- (4) Be individually tested negative for pseudorabies within 30 days prior to entry.

**PART Agr 2110 SLAUGHTER SWINE**

Agr 2110.01 Requirements for Slaughter Swine. The requirements for slaughter swine shall be the same as for slaughter cattle, as set forth in Agr 2104.

**PART 2111 DOGS AND CATS**

Agr 2111.01 No Permit Required - Certificate of Veterinary Inspection Required.

(a) All dogs and cats brought or shipped into the state of New Hampshire for resale shall be:

(1) Inoculated against common canine or feline viral diseases within one year, but not less than 7 days, before entry; and

(2) Accompanied by a certificate of veterinary inspection issued by an accredited veterinarian.

(b) The accredited veterinarian shall certify on the certificate of veterinary inspection that the dogs and cats are free from visual evidence of contagious and infectious diseases.

(c) No person shall ship into the state of New Hampshire or offer for sale or resale in the state of New Hampshire any cat or dog less than 8 weeks of age.

Agr 2111.02 Rabies.

(a) Dogs and cats shall not enter the state of New Hampshire from an area under quarantine for rabies.

(b) Every dog and cat 3 months of age and older shall be vaccinated against rabies.

(c) Dogs and cats under 3 months of age shall be vaccinated within 30 days after they have reached 3 months of age.

(d) Dogs and cats shall be vaccinated with rabies vaccine approved by the National Association of State Public Health Veterinarians, Inc.

PART Agr 2112 EQUINE

Agr 2112.01 Certificate of Veterinary Inspection Required and Negative EIA, also known as the Coggins test for Equines.

(a) A certificate of veterinary inspection shall be signed by an accredited veterinarian attesting to information listed and that the animal or animals listed are free of contagious and infectious diseases.

(b) The accredited veterinarian shall include the following on the certificate of veterinary inspection:

(1) That such animal or animals are free from all contagious and infectious diseases;

(2) That each animal or animals do not originate from a quarantined area, or an area where a contagious and infectious disease has been officially diagnosed; and

(3) The date of the last valid negative EIA test listed with accession number and laboratory conducting the test.

(c) Each animal shall be individually and completely identified.

(d) The certificate of veterinary inspection shall be valid for 30 days.

Agr 2112.02 Equine Infectious Anemia.

(a) Each equine entering the state of New Hampshire shall be accompanied by a valid negative coggins test certificate with the blood drawn and certificate signed by an accredited veterinarian.

(b) The coggins test shall be performed in a USDA-APHIS approved laboratory within 6 months prior to entry. A nursing foal in company of a dam shall not be required to be tested prior to entry, but the foal's presence shall be recorded on the dam's certificate of veterinary inspection.

(c) If the coggins test certificate does not properly or accurately describe said equine, the New Hampshire state veterinarian shall cause the equine to be:

(1) Held in quarantine and retested at the expense of the owner; or

(2) Returned to the state of origin.

Agr 2112.03 Emergency Equine Import Prohibition. All equine species shall be prohibited from importation from states that have quarantined facilities due to the infection of vesicular stomatitis.

PART Agr 2113 POULTRY

Agr 2113.01 Permit and Certificate of Veterinary Inspection Required.

(a) All hatching eggs and poultry under 20 weeks of age shall be accompanied by an NPIP USDA/VS Form 9-3 Report of Sales of Hatching Eggs, Chicks and Poults approved by the state regulatory official of the state of origin certifying that the poultry or hatching eggs are progeny of *Salmonella pullorum* and avian influenza clean flocks.

(b) All poultry over 20 weeks of age shall be accompanied by a permit issued by the New Hampshire department of agriculture, markets and food, division of animal industry, by telephone or in writing upon receipt of a proper certificate of veterinary inspection indicating that the poultry so identified shall have been tested negative for *Salmonella pullorum* and avian influenza.

PART Agr 2114 BIRDS AS HOUSEHOLD PETS

Agr 2114.01 Permit and Certificate of Veterinary Inspection Required.

(a) No bird customarily used as a household pet shall be imported into the state of New Hampshire unless accompanied by a permit and certificate of veterinary inspection.

(b) A permit shall be issued by telephone or in writing by calling the New Hampshire department of agriculture, markets and food.

(c) The accredited veterinarian shall certify the following on the certificate of veterinary inspection:

(1) That the birds and flock of origin have been inspected and are free from all contagious and infectious diseases and did not originate from a quarantined area for any contagious and infectious disease of the species; and

(2) The number and species of birds in each lot or shipment.

(d) One copy of the certificate of veterinary inspection shall accompany shipment.

(e) Certificates of veterinary inspection shall be valid for 30 days.

PART Agr 2115 CERVIDAE

**Readopt with amendments Agr 2115.01 eff. 8/31/05 (doc #8423) to read as follows:**

Agr 2115.01 ~~Cervid Import Prohibition~~: **Permit and Certificate of Veterinary Inspection Required.**

No person shall import cervids into the state of New Hampshire.

(a) A certificate of veterinary inspection shall be required for the importation of cervidae ( as defined in Agr 2101.03 (g)) into the state of New Hampshire.

(b) The permit shall be obtained prior to shipment and the permit number shall appear on the certificate of veterinary inspection.

(c) The accredited veterinarian shall certify on the certificate of veterinary inspection that:

(1) All cervidae are individually identified by permanent metal ear tag, legible tattoo, or microchip, providing a reader is available.

(2) All cervidae on the premises have been inspected;

(3) The cervidae have never been exposed to animals confirmed to have CWD or animals exposed to confirmed CWD animals; and

(4) The cervidae are free from all contagious and infectious diseases.

**Adopt Agr 2115.02 to read as follows:**

Agr 2115.02 Chronic Wasting Disease.

(a) Cervids shall only be imported into herds of destination which are participating in good standing in the USDA r the New Hampshire CWD monitoring program, whichever has more stringent standards.

(b) Herds of destination in New Hampshire shall e recognized by the regulatory body of the relevant CWD monitoring program to have achieved recognition or certification at a level consistent with at least 5 years of participation.

(c) Herds of origin shall be certified by the regulatory body of the USDA or compatible state CWD monitoring program as having achieved a level consistent with at least 5 years of participation.

(d) The status of the herd of destination shall be downgraded to equivalent status to the herd of origin if the status of the herd of origin is less than the herd of destination.

(e) Once imported, an individual cervid may never be transferred to another herd within the state of New Hampshire.

(f) Cervids may be imported to immediate slaughter if the herd of origin is in compliance with Agr 2115.02 (c), as written above.

**Readopt Agr 2116, effective 8/31/05 (Document #8423), to read as follows:**

PART Agr 2116 FERRETS

Agr 2116.01 ~~Certificate of Veterinary Inspection Required~~ - No Permit Required.

(a) To bring ferrets into the state of New Hampshire an official certificate of veterinary inspection shall be required and shall be issued prior to shipment by an accredited veterinarian of the state of origin.

(b) The accredited veterinarian shall certify on the certificate of veterinary inspection that the ferrets are:

(1) Free of infectious and contagious diseases and exposure thereof;

(2) A minimum of 6 weeks of age;

(3) Immunized for canine distemper; and

(4) Immunized for rabies if 3 months of age or older.

**Readopt Agr 2117 thru Agr 2118, effective 8/31/05 (Document #8423), to read as follows:**

PART Agr 2117 BUFFALO

Agr 2117.01 ~~Permit and Certificate of Veterinary Inspection Required~~.

(a) A permit shall be obtained prior to shipment of buffalo into the state of New Hampshire and the permit number shall appear on the certificate of veterinary inspection.

(b) A certificate of veterinary inspection shall be required for the importation of buffalo into the state of New Hampshire.

Agr 2117.02 ~~Brucellosis~~.

(a) All buffalo entering the state of New Hampshire shall have permanent identification of each animal with a metal ear tag, legible tattoo, or microchip if a reader is available.

(b) Buffalo shall also:

- (1) Be from a brucellosis classified-free herd;
- (2) If 6 months of age or older, have been tested negative for brucellosis within 30 days of shipment; or
- (3) If under 6 months of age, be identified either using a metal eartag, legible tattoo or microchip, as progeny of a brucellosis tested dam.

Agr 2117.03 Tuberculosis.

(a) All buffalo entering the state of New Hampshire shall:

- (1) Be from a tuberculosis accredited-free herd;
- (2) If 6 months of age or older, have been tested negative for tuberculosis within 60 days of shipment; or
- (3) If under 6 months of age, be identified with either a metal eartag, legible tattoo or microchip, as progeny of a tuberculosis tested dam.

**PART Agr 2118 CAMELIDAE**

Agr 2118.01 Permit and Certificate of Veterinary Inspection Required.

(a) To bring camelidae into the state of New Hampshire an official certificate of veterinary inspection shall be required and shall be issued prior to shipment by an accredited veterinarian of the state of origin.

(b) The accredited veterinarian shall certify on the certificate of veterinary inspection that:

- (1) Camelidae 6 months of age or older have been brucellosis tested negative within 30 days and tuberculosis tested negative within 60 days of shipment;
- (2) Permanent identification of each animal has been made by metal ear tag, legible tattoo, or microchip if a reader is available; and
- (3) Camelidae under 6 months of age are identified with either a metal eartag, legible tattoo or microchip, as progeny of a brucellosis and tuberculosis tested dam.

**Readopt Agr 2119 thru Agr 2120, effective 8/31/05 (Document #8423), to read as follows:**

**PART Agr 2119 RATITE**

Agr 2119.01 Permit and Certificate of Veterinary Inspection Required.

(a) To bring ratites into the state of New Hampshire an official certificate of veterinary inspection shall be required and shall be issued prior to shipment by an accredited veterinarian of the state of origin.

(b) The accredited veterinarian shall certify on the certificate of veterinary inspection that:

- (1) Ratites have been tested negative to avian influenza within 10 days of shipment; and
- (2) They have been permanently identified.

**PART Agr 2120 YAKS**

Agr 2120.01 Permit and Certificate of Veterinary Inspection Required.

(a) A permit shall be obtained prior to shipment of yaks into the state of New Hampshire and the permit number shall appear on the certificate of veterinary inspection.

(b) A certificate of veterinary inspection shall be required for the importation of yaks into the state of New Hampshire.

Agr 2120.02 Brucellosis.

(a) All yaks entering the state of New Hampshire shall have permanent identification of each animal with a metal ear tag, legible tattoo or microchip, providing a reader is available.

(b) Yaks shall also:

- (1) Be from a brucellosis classified-free herd;
- (2) Be over 6 months of age, have been tested negative for brucellosis within 30 days of shipment and be from a herd tested free of brucellosis within the last year; or
- (3) If under 6 months of age, be identified with either a metal eartag, legible tattoo or microchip, as progeny of a brucellosis tested dam.

Agr 2120.03 Tuberculosis.

(a) All yaks entering the state of New Hampshire shall:

- (1) Be from a tuberculosis accredited-free herd;
- (2) Be over 6 months of age, have been tested negative for tuberculosis within 60 days of shipment and be from a herd tested free of tuberculosis within the last year; or
- (3) If under 6 months of age, be identified with either a metal eartag, legible tattoo or microchip, as progeny of a tuberculosis tested dam.
